Portfolio: talal-portfolio.onrender.com

PROFESSIONAL SUMMARY

Result-driven **Senior Software Quality Assurance Engineer** with over 8 years of professional expertise specializing in the design, development, and execution of robust manual and automated testing architectures. Proven track record of leading cross-functional QA squads, engineering scalable automation frameworks using Python, and integrating continuous testing workflows. Demonstrated initiative in leveraging **Applied AI, Knowledge Embeddings, and LLMs** to optimize test design, automate document-driven QA workflows, and boost engineering productivity.

CORE COMPETENCIES

Applied AI & GenAI	Prompt Engineering, Agentic AI Workflows, Knowledge Embeddings (RAG), Fine-Tuning/Model Customization, Visual AI Validation
AI Tools & LLMs	ChatGPT, Google Gemini, Ollama, Claude
Automation & Frameworks	Python, Pytest, Selenium, Appium, Scrapy, BeautifulSoup, Requests, Celery, Pandas
Testing Methodologies	Functional & Non-Functional, End-to-End (E2E), Regression, RESTful API Testing, Performance Testing (JMeter, Perfmon)
Infrastructure & Cloud	Microsoft Azure, Active Directory, Domain Controller, LDAP, Network Drives, Systems Administration (Windows/Linux/Mac)
Tools & Ecosystem	Jira, Confluence, XRAY, Postman, Loop, Power Automate, GitHub, Bitbucket, Wireshark, mitmproxy, API Monitor, Process Monitor, Fiddler (Classic/Everywhere)
Databases & Web	SQL Server, MySQL, SQLite3, HTML5, CSS3, JavaScript (ES6), JQuery, Flask, Django

WORK EXPERIENCE

Senior SQA Engineer — **EBRYX**

March 2022 – Present

- **AI-Driven QA Innovation:** Engineered and deployed a locally hosted **Ollama LLM integrated with knowledge embeddings** over internal Confluence documentation (RAG), directly assisting QA engineers in automated test case generation, requirement gap analysis, and rapid onboarding.
- **Leadership & Delivery:** Command the Windows QA engineering team; own the complete lifecycle of testing deliverables, directing test planning, resource assignment, and agile Scrum execution.
- **Client Partnership:** Lead high-visibility technical syncs and weekly standups with international clients, providing clear transparency into quality metrics, system risks, and deployment status updates.
- **Framework Engineering:** Spearhead the deployment and scaling of robust automation testing frameworks across cross-platform system footprints (Windows, Mac, Linux, Azure), driving efficiency gains in regression velocity.
- **Knowledge Management:** Standardized and optimized technical test blueprints and onboarding structures within Confluence, reducing time-to-productivity for new engineers.

Software Engineer - Python — [CORDLYNC](#)

July 2021 – December 2021

- **Core Automation Development:** Engineered proprietary language analytics and text mining utilities tailored for complex sentiment categorization.
- **Data Pipeline Extraction:** Built highly reliable, customized distributed web crawlers utilizing Python and relational SQL backends to aggregate key target datasets.
- **Product Collaboration:** Contributed cleanly architected structural code and test coverage models to client-facing web ecosystems utilizing Flask and Django frameworks.

OPS Engineer - QA — [GfK \(Cogenta Global Team\)](#)

March 2019 – July 2021

- **Data Quality Automation:** Designed and deployed custom automated validation architecture within the Cogenta Global QA squad to safeguard high-volume enterprise data integrity.
- **Cross-Language Engineering:** Engineered scripts leveraging both Python and JavaScript (including JQuery) as primary languages for end-to-end extraction and API testing workflows.
- **Release Management:** Guaranteed smooth, timely milestones and pipeline execution schedules across distributed environments via meticulous validation scripts and SQL infrastructure.

QA Automation Engineer — [EPLANET COMMUNICATION](#)

March 2018 – April 2019

- **Framework Development:** Formulated and maintained a scalable web UI automated validation framework using Python and Selenium from the ground up.
- **Test Coverage Strategy:** Programmed, modularized, and cataloged multi-tiered transactional regression testing scripts within Pytest suites to safeguard continuous code revisions.
- **Collaborative Code Reviews:** Shared accountability in structural code evaluations with development peers, driving architectural adjustments for higher application testability.

Web Engineer — [GfK](#)

June 2015 – March 2018

- **Enterprise Ingestion:** Liaised continuously with enterprise global customers to decipher functional expectations and execute advanced crawler projects optimized for competitive Pricing Intelligence.
- **High-Performance Scripts:** Produced heavily optimized, clean, and extensively documented data acquisition systems to scale programmatic ingestion pipelines safely.

ACADEMIC BACKGROUND

Bachelor of Science in Computer Science (BSCS) — [University of Karachi](#)

December 2009 – December 2013

- **Capstone Project:** Bus Route Finder — Built a comprehensive location routing map solution integration leveraging modern Geolocation APIs.
